

Geotechnik Dunkel

Pneumatic sampling PR10

For light pile driving
Pneumatic drive
Compressor unit optional

Scope of delivery, accessories and technical data

Pneumatic sampling PR10

- o For light pile driving (DPL, similar to EN 22476-2)
- o Pneumatic drive with a working pressure < 1.5 bar (compressor unit required, e.g. VD 14)
- o Complies with the Outdoor Directive 2000/14/EC (Noise Abatement)
- o Ready for use on site in just a few steps
- o Including safety rod, thus operation with approx. 1 m safety distance possible
- o Drop weight: 10 kg, drop height: 500 mm
- o Length 825 mm, largest diameter: 100 mm
- o Total weight: 16 kg
- o Noise emission (LWA) 104 dB

Compressor unit VD14

The VD14 compressor is the optimal complement to the PR10 pneumatic ram probe. The compressor pump is maintenance-free and extremely low-wear.

The novel design dispenses with often conventional carbon plates (sliders). Running times of 10,000 h until the first service are quite possible.

Detailed information is available in the data sheets „Compressors“ or on the website geotechnik-dunkel.de

The PR10 can be ordered as follows:

- o PR10 Order Number 101186
- o Compressor unit VD14-B Order Number 101371
- o Compressor unit VD14-E Order Number 106170
- o Wagon off road..... Order Number 105909
