# Mobile Drill Intl

## B-11

### Designed for Limited Access Work

- Optimized for basement work, tight residential lots, and indoor drilling
- Fits through house doors and operates between buildings
- Can be fully disassembled without tools for transport into restricted areas
- Capable of operation with or without undercarriage

### Performance & Tooling Compatibility

- 1,100 ft-lb max. torque at 2,900 psi
- Works with 3 ft tooling
- Pullback capacity: 12,000 lbs – for auger and SPT tooling
- Integrated SPT auto-hammer
- Integrated rotary drive for drilling and sampling applications
- Quick-change tooling via removable hand winch and load beam

### Power & Utilities

- Powered by external hydraulic power pack
  - Flow: 12 gpm
  - Pressure: 2,300 psi

### Dimensions & Weight

- Machine weight: approx. 2,650 lbs
- Transport width (min): 29 in – fits through standard doorways
- Working height (max): 8 ft – designed for basement and low-ceiling work

### Operations & Stability

- Rotating operator console for safe visibility in confined areas
- Hydraulic mast height adjustment
- 4 outriggers for stable setup on uneven ground
- Ground anchors to increase available downforce when needed

### Worksite Convenience

- Onboard workbench with vise and practical storage options
